

# ROAD AND TRANSPORTATION MASTERPLAN

PALESTINE

TA 2012013 PS 00 F10  
**IV Transport Sub-Sectors Plans**

SEPTEMBER 30,2016

## 1 Introduction

NTMP multi-modal transport network proposal is presented in the following chapter. In order to satisfy the objectives already presented in ¶II – *Objectives, Needs and Priorities* and in line with what is explained in ¶III – *Road and Transportation Master Plan Overview*, NTMP overall proposal involves the following transport sub-sectors networks:

- Road Transport Network;
- Rail Transport Network;
- Air Infrastructure Network;
- Maritime Infrastructure Network, and;
- Public Transport Network.

NTMP multi-modal transport network proposal considers also the following complementary sectors that do not represent *per se* single transport sub-sectors but are strictly related to transportation:

- Logistics (Freight Transport), and;
- Border Crossing Points – BCPs.

Finally, a special focus is dedicated to the proposal envisaging the realization of a multi-modal transport link between West Bank and Gaza Strip.

For each of the involved transport sub-sectors listed above, in-depth descriptions, with data and original maps, are provided. Finally, since the entire implementation of NTMP is organized in phases, the presentation of each transport sub-sector plan is structured according to the implementation phases.
