1. Introduction

7-Day Traffic Counts Survey was carried out From Wednesday, June 10, 2015 to Tuesday, June 16, 2015 as part of the Roads and Transportation Master Plan of West Bank and Gaza Strip project.

The 18 hour, seven-day survey campaign was carried out at eight locations in both West Bank and Gaza Strip.

The main aim of the survey is to identify the peak interval basis of which Manual Traffic Count Survey, Travel Time Survey and Public Transport Survey time interval is defined.

The report includes the following five chapters:

- 7-Day Traffic Counts Survey Details
- Survey Methodology
- Survey Data Analysis
- Survey Results Analysis
- Original Survey Sheets

2. 7-Day Traffic Counts Survey Details

Date and Time of Survey

The survey was carried out From Wednesday, June 10, 2015 to Tuesday, June 16, 2015 for eighteen hours per day from 5.00 to 23.00.

Location of the Survey

The survey was carried out on eight locations in West Bank and Gaza Strip.

Location D was not included in the final analysis of the survey results because the Israeli soldiers interrupted traffic counts on 8:45 am Friday 12, June 2015 (the third day of survey)

The following figure shows the map of survey locations.

The eight survey locations were identified based on the statistical analysis of the existing road network through GIS data received from the Ministry of Transportation and based on the data collected from the multiple official local sources such as Ministry of Transportation to identify the road hierarchy and geometry and exiting traffic pattern.

The second figure shows the weekly profile graph of all counted vehicles at all locations (the total number of vehicles for all the directions counted during the eighteen hours). Friday presents the lowest traffic volumes at 5 locations out of 7. For the locations H and C Friday is the day of the week with the highest traffic volume, due to the location of these two station in proximity to touristic places: to Jericho C and to the Seashore in Gaza Strip H.

Figure 1. Map of the 7-Day Traffic Counts Locations

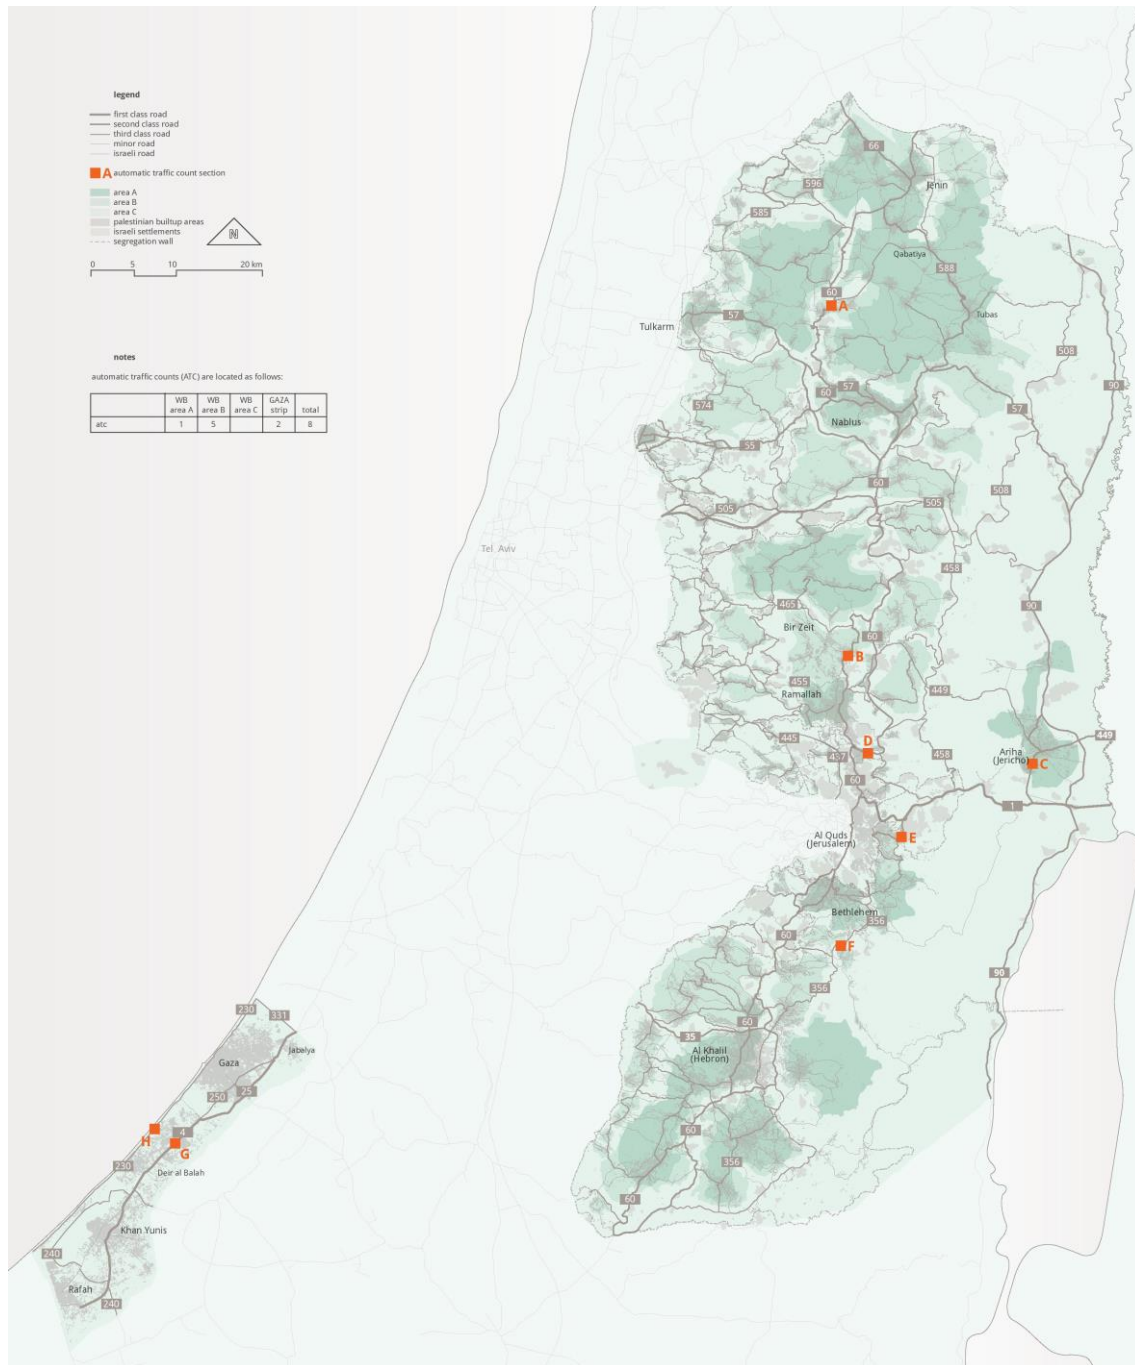

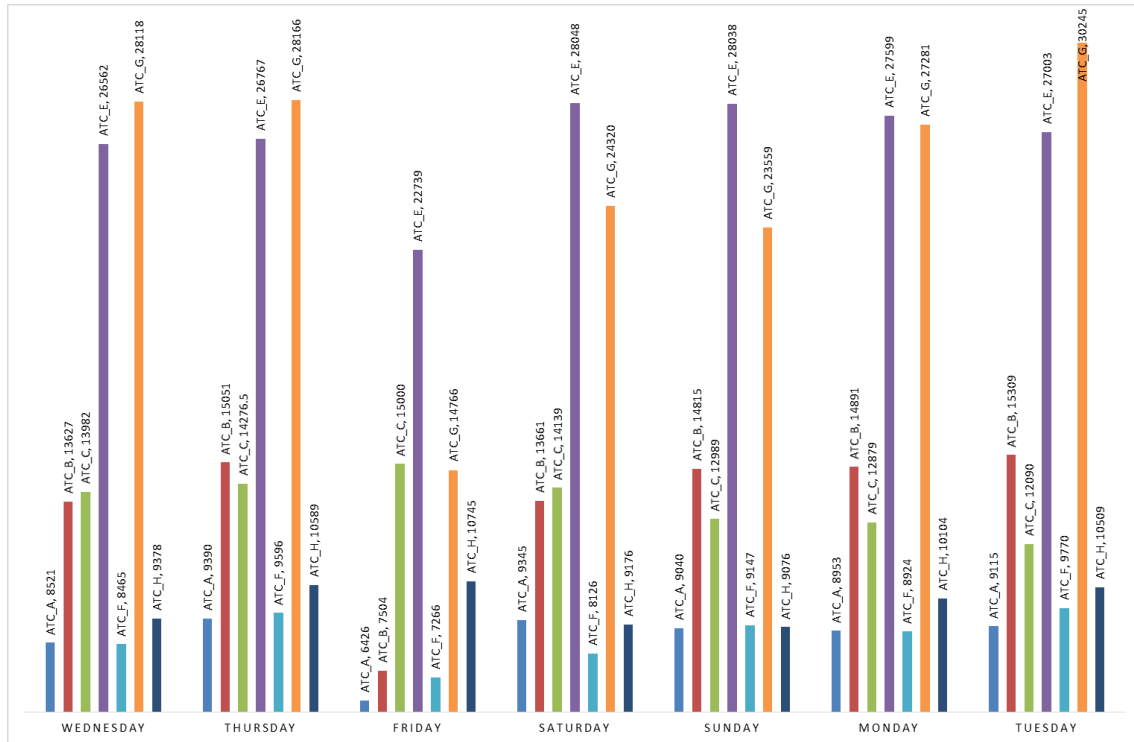

Figure 2. Weekly Profile of All the Survey Locations

3. Survey Methodology

7-Day Traffic Counts Survey was carried out manually.

A team of 48 operators was responsible to collect the data; 6 operators for each counting location on three shifts. A skilled coordinator at each survey location supervised them.

In addition, the team included a professional supervisor and a team leader who was responsible for managing the entire traffic counts survey. After the survey, the collected data were verified and checked by team leader and supervisor, no discrepancies were noticed.

The following eight classes of vehicles were considered for the survey:

Tab 1. Vehicle Class and Type Considered for the Survey

No.	Vehicle Class	Vehicle Type
1	Class 1	Motorcycle
2	Class 2	Passenger Car
3	Class 3 and 5	Light Heavy Vehicles
4	Class 4	Private Bus
5		Service Bus Collective
6	Class 4	Public Transporter
7	Class 6,7,8,9	Large Heavy Vehicles
8	Class 10,11,12,13	Light Heavy Vehicles

4. Survey Data Analysis

The following table shows, for each location, the total amount of counted vehicles (during the eighteen hours), the weekly mean value and the percentage of the mean weekly value with respect to the total mean value of all locations. The cells highlighted in blue show the value, which has less deviation from the weekly mean value. The last lines of the table show the total amount of counted vehicles for each day for all locations and the percentage of each day with respect to the weekly total amount of counted vehicles for all the locations (total weight). As explained below, in order to better estimate the average day to use for the O/D survey, it is preferable not to use the simple mathematical average values (total weight) because they do not correctly represent traffic patterns.

Tab 2. Eighteen- Hours Counted Vehicles

Location	total amount of passages for all directions							mean	weight of each location
	Wednesday	Thursday	Friday	Saturday	Sunday	Monday	Tuesday		
	day 1	day 2	day 3	day 4	day 5	day 6	day 7		
ATC_A	8521	9390	6426	9345	9040	8953	9115	8684	8.16%
ATC_B	13627	15051	7504	13661	14815	14891	15309	13551	12.73%
ATC_C	13982	14277	15000	14139	12989	12879	12090	13622	12.80%

ATC_H	9378	10589	10745	9176	9076	10104	10509	9940	9.34%
sum	108653	113836	84446	106815	106664	110631	114041	106440	1
total weight	14.58%	15.28%	11.33%	14.34%	14.32%	14.85%	15.31%		

The following table shows the mean square deviation of all the movements with respect to the weekly mean value for each location. The mean square deviation is calculated with the following

formula: $\sqrt{\frac{(\text{counted passages} - \text{weekly mean value})^2}{\text{counted passages}}}$

Tab 3. Mean Square Deviation

mean square deviation	Wednesday	Thursday	Friday	Saturday	Sunday	Monday	Tuesday
ATC_A	1.7658	7.2857	28.1678	6.8377	3.7443	2.8429	4.5144

In the following tables of 4 to 6 the values of the mean square deviation multiplied by the weight of each location are reported. The results in the first table are related to all days of the week. In the second table results do not consider Friday and in the third one results do not consider Friday and Saturday.

5. Survey Results Analysis

The mean day of the week is the one with the lowest value of the sum of all the weighted mean square deviations:

- Wednesday, if we consider all days of the week;
- Monday, if we do not consider Friday and Friday + Saturday.

The following tables show the different day peak periods (both for Monday and Wednesday). The first column of the tables shows the maximum value among the counted 15-minute intervals, the upcoming ones show the hourly, three-hour and four-hour peak interval of the day.

The different hourly values are calculated starting from the traffic counts data by adding together all the possible 15-minute intervals (4 intervals for the hourly value, 12 intervals for the three-hourly value and 16 intervals for the four-hourly value).

Tab 7. Wednesday Peak Periods

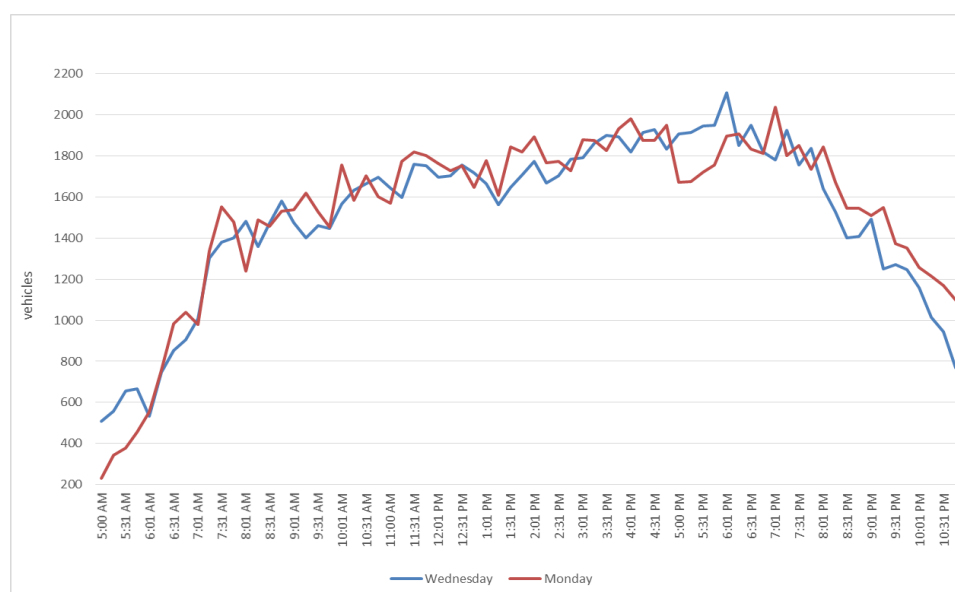

WEDNESDAY	15 minutes	1 hour	3 hours	4 hours
maximum value	2108	7914	23002	30424
time frame	6.00 - 6.15 pm	5.15 - 6.15 pm	3.45 - 6.45 pm	3.30 - 7.30 pm
% of the day	1.94%	7.28%	21.17%	28.00%

Tab 8. Monday Peak Periods

MONDAY	15 minutes	1 hour	3 hours	4 hours
maximum value	2036	7674	22350	29612
time frame	7.00 - 7.15 pm	4.00 - 5.00 pm	2.00 - 5.00 pm	3.15 - 7.15 pm
% of the day	1.84%	6.94%	20.20%	26.77%

The following graph shows the eighteen hours profile of all counted vehicles in all the seven locations on Monday and Wednesday.

Figure 3. Eighteen -Hours Profile on Monday and Wednesday

Based on the results of the /7-Day Traffic Survey analysis, **Monday** presents to be the **average day of the week** and the **four-hourly peak period** is comprised between **15.15** and **19.15**.

6. Original Survey Sheets

The following tables are the original 7-day traffic counts survey sheets

Tab 9. 7-Day Traffic Counts Original Survey Sheet – Location A – Day 1
